Non-COVID related	No. Regular plan benefits apply.	N/A
Others (please specify below)		
<p>Anthem cannot speak for CMS but it is our understanding beneficiary cost-shares are waived under Medicare Part B for medical visits (including at a provider office, hospital, emergency department, nursing facility, etc.) during which a COVID-19 test is administered or ordered or which an individual is being evaluated to determine the need for such test. Medicare covers testing without any patient cost sharing. They have also expanded coding to ensure Medicare beneficiaries are able to access telehealth services under the Secretary's emergency authority.</p> <p>For more information, visit: https://www.ucppoplans.com</p> <p style="text-align: center;">https://www.medicare.gov/medicare-coronavirus</p>		

Health Net*

Telehealth for:	Co-share waived? Yes/No (if not, specify co-share \$)	If waived, until when?
COVID-19 Medical Services	Yes	5/31/2021

Non-COVID related	No - \$20 copay	N/A
Emergency Room		
COVID-related	Yes	7/31/2021
Non-COVID related	No - \$125 per visit	N/A

*Kaiser Permanente will continue to follow federal regulations that require no out-of-pocket cost sharing for all COVID-19 diagnostic testing for members through the end of the national public health emergency, which was recently extended to October 18, 2021. Kaiser Permanente, by policy, will extend the coverage to the last day of the month following the end of the national public health emergency.

Note: If members have an urgent/emergent need they are covered as they normally would be except the lab/screening for COVID is zero. This does not mean they can just go to out of network. It still needs to be urgent and emergent which means it wasn't reasonable for them to come to KP.

Non-Kaiser facilities (non-participating providers) will be covered at \$0 member cost share for COVID 19 care if urgent/emergent or referred by Kaiser Permanente.

Are members covered if they display COVID-19 symptoms while traveling outside their Kaiser Permanente service area?

Yes. They should seek care immediately if showing symptoms of COVID-19, wherever they are, for diagnosis and testing. Emergency and urgent care services are covered when a member is outside their service area. Depending on their health, it may be recommended that they return to the service area and seek care from Kaiser Permanente providers for treatment.

If a member is traveling domestically and is having COVID-19 symptoms, what should they do?

If a member has COVID-19 symptoms (fever, cough, trouble breathing) or believes they've been exposed, they can call the Member Services Contact Center (each region's phone number is located on

kp.org) or the Away From Home travel line at 951-268-3900 (available 24/7) to get directed to the most appropriate care.

Does Kaiser cover asymptomatic testing for UC members at no charge, at both Kaiser facility and outside Kaiser facility? Are there any limitations? If there is a charge, what is the charge? What does Kaiser pay for/cover for testing, services and treatment of COVID related care when outside KP? What are exclusions? (The table above addresses only that emergency and urgent care services are covered when outside KP.)

As you are aware this is a rapidly changing environment and our responses below reflect our position today. If anything changes we will be sure to inform UC. Yes, Kaiser will cover asymptomatic testing for members at no charge. Diagnostic (PCR) testing capacity continues to expand for members who are symptomatic, as well as certain asymptomatic members who are coming in for clinical procedures or who require testing for other reasons.

If you choose to have employees undergo testing through a third-party vendor, the cost could be treated as a claim and processed like other outside covered services. These costs will be part of your claims experience, and could impact future renewal rates.

To be eligible for claims reimbursement, testing must meet these requirements:

- Testing must be authorized by an attending health care provider who is licensed under state law and directly responsible for providing patient care.
- Tests must be administered by a licensed health care provider.
- The test they use must be authorized by the FDA, or the developer must have requested an emergency use authorization from the FDA.
- The vendor must have a process in place for submitting claims to Kaiser Permanente.
- If the vendor has questions about submitting claims, ask your Kaiser Permanente account manager.
- Appropriate data must be collected and submitted to process the claim payment, including the covered member's name, date of birth, address, and member ID number.

Keep in mind that coverage for testing to screen for general workplace health and safety (such as employee "return to work" programs), for public health surveillance for SARS-CoV-2, or for any other purpose not primarily intended for personal diagnosis or treatment of COVID-19 or another condition is not required by the FFCRA.
